

Why does your practice need *TOTAL ACCESS* for webinars?

- ▶ With changes in the healthcare world emerging almost daily, it's challenging to keep track of what you need to know.
- ▶ There may be incentive programs that could provide additional revenue for your practice...if you knew about them, or
- ▶ Perhaps you aren't aware of those that will be deducting revenue from your practice automatically because you aren't taking the appropriate action.
- ▶ There are multiple entities that can audit your practice and cost you substantially. It is important to know what is being targeted and why.
- ▶ Every office needs an ongoing educational component...with a sensible cost.
- ▶ With ICD-10 implementation approaching, your office needs to be on board now. ICD-10 can affect all areas of your practice.

What benefits can *TOTAL ACCESS* provide for you?

- ▶ Leaving the office is often not an option...and especially for a long period of time. Stay in your office and create a learning experience for you and your staff.
- ▶ The 90 minute, live and interactive format can be woven into your work day.
- ▶ You can gather your questions and have them answered since the instructor is speaking to you in a live setting.
- ▶ Your practice has *free* 24 hour access to our Audio Library. Hours of useful information and every live webinar becomes part of the Audio Library for future review.
- ▶ The Audio Library also gives your physicians an opportunity to hear the information that will benefit your practice in a timeframe that works for them...they can dial in at night or even on the weekend.
- ▶ Present employees need to be refreshed and motivated on an ongoing basis.
- ▶ Perhaps there are processes and policies and procedures that need updating.

Special pricing for WVSMA members: only \$225 per month (regular price \$249)
